CONCEPT AMG GT TRACK SPORT completes first successful test miles

- Components of the concept vehicle put to the test under highly dynamic conditions
- Future member of the GT family as a vision with a promise

Affalterbach. Following the final touches to the CONCEPT AMG GT TRACK SPORT in late July 2025 in Affalterbach, an intensive testing phase now begins. The prototype, camouflaged with yellow and red accents, faces the first driving dynamics testing on tracks and race circuits. This newest and most impressive offshoot of the GT family builds on the philosophy and key strengths of the AMG two-door sports car and takes it a significant step further with a boundary-pushing, uncompromising design.

The radical appearance underscores the focus on maximum driving dynamics, intelligent lightweight construction and exploration into the physical limits of performance. The concept vehicle features further optimized weight balance, AMG V8 drive technology and a sophisticated aerodynamic architecture. With racetrack testing, Mercedes-AMG aims to validate all systems and complex components – under the toughest conditions and in compliance with the brand's high quality and performance standards.

“With the CONCEPT AMG GT TRACK SPORT, we are once again exploring the limits of what is possible. We have a world-class team working on this concept with incomparable AMG spirit. It takes us to the physical and driving dynamics limit. We have a vision and make a promise: The future will be extreme.”

Michael Schiebe, Chairman of the Management Board of Mercedes-AMG GmbH
and Head of Mercedes-Benz G-Class & Mercedes-Maybach Business Units
