Mercedes-Benz GLC Plug-in Hybrid SUV Offers Best-in-Segment All-Electric Range of 54 Miles

Atlanta. The new 2025 Mercedes-Benz GLC 350e 4MATIC SUV sets itself apart from the competition and the benchmark in its class by offering an impressive 54 miles of all-electric range, according to EPA certification¹. The vehicle is now available at U.S. dealerships starting from \$59,900².

The new Mercedes-Benz GLC 350e 4MATIC SUV provides the optimum balance of electric efficiency and extended range for longer journeys. The sophisticated hybrid system features a 134 hp electric motor and 23.3 kWh battery to deliver a combined system output of 313 hp and 406 lb-ft of torque. It offers an exceptional electric driving experience with an EPA electric range of up to 54 miles¹, making most daily commutes more flexible and economical in all-electric mode without the need to rely on the internal combustion engine. Further optimizing efficiency, the "Hybrid" drive program prioritizes electric propulsion for the most appropriate driving situations, for example, during city driving. The standard 60-kW DC charging capacity enables a full battery charge to be achieved in as little as 30 minutes³.

Consistent with the broader GLC SUV lineup, the streamlined packaging structure of the new plug-in hybrid model offers Standard, Exclusive and Pinnacle Trims, each providing a variety of comfort features and advanced technologies. The generous standard equipment level includes a self-leveling suspension system, Wireless Apple CarPlay and Android Auto, KEYLESS-GO® and KEYLESS-START®, center airbag between the front seats, and much more. The GLC 350e also features the new third generation MBUX (Mercedes-Benz User Experience) infotainment system, providing an expandable portfolio of in-car apps, as well as the new Routines function.

Customers can personalize their vehicle with the choice of 11 different exterior paint colors, including four MANUFAKTUR finishes, 13 different upholstery selections and six wheel designs that include two new wheels exclusive to the GLC 350e. The available AMG Line and exterior Night Package enable further individualization.

The new 2025 Mercedes-Benz GLC 350e 4MATIC SUV is now available at U.S. dealerships starting at \$59,900², joining the already impressive and highly compelling plug-in hybrid family that includes the GLE 450e 4MATIC SUV and S 580e 4MATIC sedan, both setting the standard in their respective segments.

¹ EPA testing follows SAE Recommended Practice J1711, June 2010, "Recommended Practice for Measuring the Exhaust Emissions and Fuel Economy of Hybrid-Electric Vehicles, Including Plug-in Hybrid Vehicles," with some exceptions. [EPA Plug-In Hybrid Vehicle Test Procedure](#)

² Above pricing excludes \$1,150 destination and delivery charge

³ Charging times are estimated and may vary by location and equipment. Charging stations must be compatible with Combined Charging System (CCS). See your dealer for more information.
