

Quick Reference Guide

MY25 Sprinter

Base Models & MSRP*

▪ Cargo Vans	\$50,830
▪ Crew Vans	\$53,830
▪ Passenger Vans	\$56,930
▪ Cab Chassis	\$54,130

**Above price excludes \$2,295 delivery & destination charge.*

What's New

- Moving Off Information System in combination with 360 degree camera (3D Surround View)
- Sideguard Assist in combination with Blind Spot Assist
- Latest generation MBUX system with 10.25" touchscreen
- New color Hightech Silver available
- Passive Child Detection in Vehicle on Crew and Passenger van models now standard
- Tire Pressure Monitoring standard on dual rear wheel models
- Rain sensor standard
- Sliding Door 2ndary catch B-pillar on Crew and Passenger van models standard
- Winter Package Plus (New)
- Comfort Plus Package (enhanced content)
- Comfort Plus Package with heated steering wheel (New)
- Drive Assist Package (New)

Standard Feature Highlights

- Mercedes me connect service bundle "Optimized Assistance" standard with 12 month complimentary runtime. "Efficient Fleet Management" and "Data interfaces for Vans" with trial period
- Active Brake Assist
- Instrument Cluster with color Display
- Heated Driver's seat
- Multifunction Steering Wheel
- Electrically Adjustable Side Mirrors
- Cruise Control
- Keyless start
- Hold Function
- Charging capabilities with 2 USB-C sockets in the dashboard
- Passenger vans include USB-C charging capabilities in the rear
- Trailer hitch prep wiring package¹
- Load-adaptive electronic stability program
- All-season tires

¹ Not available for the 170" WB Passenger Van

- Adjustable steering wheel (angle) with standard shift paddles
- Wheelbases of up to 170" along with overhang available for the 170" EXT wheelbase for even more cargo space
- Load compartment volume of up to 533 cu. Ft.
- Loading width of around 61"
- Metal load compartment floor (Cargo Vans)
- Front, Side Thorax-Pelvis and Window Airbags
- Passive Child Detection in Vehicle on Crew and Passenger van models
- Tire Pressure Monitoring
- Rain sensor standard

Optional Feature Highlights

- Latest generation MBUX system with 10.25" touchscreen
- Reclinable seats offered in the passenger van
- Power front seats
- Air Suspension for Cab Chassis
- High performance air-condition
- Electrical sliding door and step
- Robust, washable paneling on the load compartment walls
- Optional lightweight plastic floor
- Heated and pivoting power front seats
- Reinforced seat bases with three-point seat belt
- Heated windshield
- Optional all-wheel drive
- Electrically folding exterior mirrors
- Anti-theft alarm system
- Automatic climate control
- eXpertUpfitter solutions offers for the load compartment to be individualized with shelving systems, a workbench or heavy-duty wood floors for heavy loads.

Technical Highlights

- **Mercedes-Benz User Experience (MBUX):** A new multimedia system featuring innovative technology based on Artificial Intelligence and an intuitive operating system. MBUX technology is pioneering a new level of in- car experience. MBUX can be operated by Voice Control, the Touchscreen, Touchpad and Touch Control Buttons on the steering wheel. The system has learning capabilities and intelligent Voice Control with natural language understanding and a verbal cue of "Hey Mercedes". New generation offering an extended range of options bringing in greater vehicle control and increased comfort.
- **360 degree camera (3D Surround View) with Moving Off Information System:** High definition cameras are placed on the front, rear, left, and right sides of the vehicle. Videos from these four cameras create the 360° view of the vehicle surroundings. The passive MOI system monitors the area directly in front of the vehicle. The driver is first informed by an information signal, if a road user (cyclist/pedestrian etc.) is in the monitored area.
- **Blind Spot Assist including Rear Cross Traffic Alert, Exit Warning**
 - Blind Spot Assist monitors the rear and side areas of the vehicle using two short-range radar sensors located in the rear bumper.

- Rear Cross Traffic Alert: Automatic braking to avoid collision with traffic crossing the vehicle's path (e.g. vehicles, pedestrians) when reversing. If an object is registered, the warning symbol on the corresponding side mirror lights up in red and additionally, an acoustic warning signal sounds.
 - Exit Warning alerts the passengers when exiting the vehicle, if an approaching vehicle is registered
- **Sideguard Assist (in combination with Blind Spot Assist)** warns the driver when a road user (e.g. cyclist) enters a defined area on the passenger side.
- **Digital inside rear view mirror** improves the view to the rear. A camera is installed at the rear of the vehicle and the image is displayed on the screen of the interior mirror. This solution has a high benefit for customers with no or limited rear view. For Cab Chassis a pre-installation is offered ex-Factory with instruction to complete the installment by the Upfitter.
- **Active Distance Assist DISTRONIC®** is able to follow a vehicle in front at a pre-selected distance at wide range of speeds and relieves driver strain on long journeys and when following vehicles.
- **Active Lane Keeping Assist** is able to detect unintentional lane departure, warn the driver and help to guide the vehicle back into its lane with one-sided brake actuation.
- **Park Assist** utilizes twelve radar sensors installed on the front and rear bumper. When the car's in reverse, Park Assist displays a top-view 360 degree pictogram of the car and parking space, providing helpful steering guidance.
- **Traffic Sign Assist:** If the cruise control is activated and the optimal available Traffic Sign Assist has detected a speed restriction sign, the maximum permissible speed displayed in the instrument display can be stored and the vehicles maintains or does not exceed this speed.
- **Crosswind Assist** detects strong gusts of crosswind and helps the driver to stay on course. At speeds over 50 mph it corrects the vehicle's course by means of automatic braking intervention on the wheels on the side of the vehicle facing the wind.
- **Attention Assist** gives the driver visual and acoustic warnings if it detects typical signs of drowsiness or inattention, and urges the driver to take a break. Steering wheel movements are recorded and used to create an individual driver profile.
- **Active Brake Assist with Cross-Traffic Function** continuously checks the safe distance to the vehicle immediately in front, warns the driver optically and acoustically of potential collisions and autonomously brakes the vehicle to a full stop if required.
- **Touch Control Buttons** touch-sensitive controls on the steering wheel for instrument cluster and infotainment system control, similar to a smart-phone interface, which respond to vertical and horizontal swiping movements.

4-cyl. Diesel Options at a Glance
