Technical Highlights

- **Driver Assistance Systems:** the enhanced intelligent hands-off detection includes sensing via finger pads and is sensitive to specific conditions:
 - **Active Distance Assist DISTRONIC®** is able to follow a vehicle in front at a pre-selected distance at wide range of speeds and relieves driver strain on long journeys and when following vehicles.
 - **Active Blind Spot Assist** informs the driver to help avoid an imminent side impact by single-sided braking.
 - **Active Steering Assist** can actively intervene even if road lines are unclear or non-existent.

- **Active Lane Keeping Assist** is able to detect unintentional lane departure, warn the driver and help to guide the vehicle back into its lane with one-sided brake actuation.
- **PRE-SAFE® PLUS** activates the PRE-SAFE safety measures when a collision from behind is imminent.
- **Active Brake Assist with Cross-Traffic Function** gives the driver a visual warning if the distance to the vehicle in front is too small. On detecting the danger of a collision there is an acoustic warning, driver braking can be assisted and, if the driver fails to react, the speed can be reduced autonomously.
- **Speed Limit Assist** detects and displays the speed limit.
- **Active Lane Change Assist:** radar-and-camera-based system that aids the driver when changing lanes, for example, when overtaking. When a turn is indicated for at least two seconds, Active Lane Change Assist will aid with steering into the adjacent lane if it detects the lane is empty.
- **Evasive Steering Assist:** when a driver deliberately or instinctively performs an evasive maneuver, this system assists by adding calculated steering torque to aid in steering wheel movement.
- **PRE-SAFE® Sound:** omits a short interference signal if an imminent collision is detected, triggering a protective reflex in the human ear referred to as the “stapedius reflex,” which can help reduce hearing loss in the event of an accident.
- **Car-to-X Communication:** the C-Class simultaneously acts as a receiver and transmitter, conveying warning messages and evaluating driving conditions, effectively allowing the driver to “see around corners” and “through obstacles.”
- **Touch Control Buttons:** touch-sensitive controls on the steering wheel for instrument cluster and infotainment system control, similar to a smart-phone interface, which respond to vertical and horizontal swiping movements.

Model Positioning

- A benchmark for the class; full range of mid-luxury sedans equipped with the latest Mercedes-Benz safety and connectivity technology and offering pinnacle performance with biturbo engines and AMG variants.
